ABOUT

A few years ago I had a deep realization that my time and energy was limited but I still wanted to increase my output and impact on the world, so I decided to go digital and become a software developer. Since then I've grown a solid skill set of web development technologies such as HTML, CSS, Javascript, React, Node.js, Express, and Bootstrap by creating a portfolio of modern web and mobile applications.

EDUCATION

SOFTWARE DEVELOPMENT MASTERMIND, INC

JANUARY, 2022 - DECEMBER 2022 REMOTE

The Software Development Mastermind program is a rigorous, hands-on mentorship program I attended for 16 weeks. The program simulates a work environment by focusing on building real-world projects under deadlines. There is constant feedback and coaching throughout the process that has helped to refine and enhance my programming skills.

PENNWEST CALIFORNIA

JANUARY, 2019 - DECEMBER 2019 CALIFORNIA, PA

MS in Exercise Science

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPMENT MASTERMIND, INC

SEPTEMBER, 2022 - PRESENT REMOTE

CODING SUPPORT COACH

- Provide feedback and guidance to students' coding projects.
- Provide code reviews to evaluate the quality and understanding of the students' completed projects.
- Provide motivational support to students struggling with the program.

PAGESAKE

MARCH, 2023 - NOVEMBER 2023 REMOTE

SOFTWARE ENGINEER

- Quickly learned Nextjs & TailwindCSS to create fast & responsive landing pages
- Implemented DaisyUI themes and components across variables site templates
- Created various frontend custom components to be used on the website

PROJECT EXPERIENCE

UNMUTE APP

- Created a talking soundboard mobile app to give speech-impaired kids an alternate means of communicating
- Implemented innovative UI/UX design solutions, employing modern design principles to improve user experience and engagement
- Quickly learned React Native while building out the core features of the MVP in just 4 weeks
- Link: <https://github.com/andywangpt/unMute-app>

CHOW-GPT APP

- Built a full-stack application that uses the OpenAI API to generate dinner ideas based on user-inputted left over ingredients
- Used Express and Node.js to access OpenAI's GPT-3 model and prompt design/engineering to solve everyday problems
- Utilized Bootstrap and React components to create a user-friendly interface for the application
- Link: <https://chow-gpt.onrender.com/>

SKILLS AND INTERESTS

Tech Skills: HTML | CSS | JavaScript | React | React Native | NextJS | Node | Express | Bootstrap | Tailwind | REST APIs

Soft Skills: Sales & Customer Service (12+ years) Video Production & Marketing (3 years)

Languages: English (fluent), Mandarin (conversational)

Interests: DIYing, Snowboarding, Fitness
